

# **Description:**

TS100 Thermo Shaker is a temperature controlled shaker, which is used for a variety of molecular biology applications. Speed, time and temperature settings are continuously visible on the LCD, simultaneously showing both actual and selected values. Integral over-temperature control ensures long time, safety and sample integrity.

### Application:

- Storing samples at ice bucket temperatures.
- Storing enzymes or DNA libraries at work station.
- Transporting samples from the field at exactly the right temperature.
- Heating samples in the field.
- Enzyme reactions and deactivations.
- ◆ PCR sample preparation.
